✓ IP65/IP55 OUTDOOR CABINET

✓ OUTDOOR CABINET WITH  
AIR CONDITIONER

✓ OUTDOOR ENERGY STORAGE  
CABINET

✓ 19 INCH

## Overview

---

What does Bess stand for?

de stem—1.Introduction Reference Architecture for utility-scale battery energy storage system (BESS)This documentation provides a Reference Architecture for power distribution and conver ion – and energy and assets monitoring – for a utility-scale battery energy storage system.

What is a Bess system?

At the heart of WEG's BESS solution is an advanced energy control and management solution. This sophisticated system coordinates different operation modes, optimizing the overall performance of the energy storage production.

What is Bess ion & energy and assets monitoring?

ion – and energy and assets monitoring – for a utility-scale battery energy storage system BESS). It is intended to be used together with additional relevant documents provided in this package.The main goal is to support BESS system designers by showing an example desi.

How much power does a Bess have?

The system is built of two main blocks. The PCS building block, responsible for the main control of the mobile BESS. The nominal power rating of the PCS block is 225 kVA, with a maximum peak power in the peak shaving mode of 275 kW . The second block is the modular battery pack.

Why should you choose a Bess energy storage system?

The mobility and flexibility of the system enables novel applications and deployments where BESS previously were unused due to the non-flexible solutions. The system is modular, meaning that the energy storage capacity can be quickly adapted depending on the application case, in contrast to larger and bulkier solutions.

How a Bess coordination scheme can be used for interoperable mobile System der?

Accommodating novel and state-of-the-art BESS coordination and protection capabilities. Furthermore, such a coordination scheme could be utilized to effectively connect multiple VMS and other mobile BESS in an effective manner, for an interoperable coordinated mobile system DER.
