

## SolarMax Energy Systems

# What are the Danish home energy storage standards

## Overview

---

Can energy storage units be installed in the Danish power system?

Elsystemansvar A/S (subsidiary of Energinet) has asked Ea Energy Analyses to analyse the benefits and main drivers for the installation of storage units in the Danish power system. This will supplement the technology aspects in the recent Technology Catalogue on Energy Storage (DEA and Energinet, 2019).

Can a hydrogen-based energy storage system be used in Denmark?

Bulk physical storage of renewable energy produced gases can act as a longer-term storage solution (hours, days, weeks, months) to help maintain flexibility in a fossil-free energy grid (The Danish Partnership for Hydrogen and Fuel Cells). Without the hydrogen scenario, the potential for hydrogen-based energy storage in Denmark will be limited.

Is a storage facility a challenge in Denmark?

In Denmark, a storage facility can by definition (Energinet, 2019): The participation of storage assets in different markets may be a challenge. These challenges might be just as much a consequence of regulatory design as technical limitations.

How are energy services delivered in Denmark?

Some of the services are delivered through energy markets in Denmark (they are referenced in each of the subsections); certain are remunerated in other countries, e.g. in the US, or are not linked to any compensation at all.

Which storage demonstration projects have been carried out in Denmark?

As reported in Table 1, two significant storage demonstration projects were carried out in Denmark in the past years. The batteries installed in Nordhavn (Copenhagen) were tested mainly for the provision of primary regulation (TSO service) and peak shaving (DSO service).

Do battery energy storage systems provide primary control reserves in Germany?

IEEE. Zeh, A., Muller, M., Naumann, M., & Hesse, H. (2016). Fundamentals of using battery energy storage systems to provide primary control reserves in Germany. Batteries. Table 9 carries the requirements and the remuneration for units participating in the Danish ancillary services markets.

## What are the Danish home energy storage standards

### Danish Energy Agency presses the start button for billion-dollar

The new CCS Fund has DKK 28.7 billion (USD 4.2 billion) to secure capture and storage of CO<sub>2</sub> from as early as 2029, and to help Denmark along its path to climate neutrality. ...
