

SolarMax Energy Systems

What are the gravity energy storage power stations in Vietnam

Overview

Can battery energy storage systems improve power system flexibility?

Recently, Vietnam's National Power Transmission Corporation (EVNNPT) shared that it is looking into Battery Energy Storage Systems (BESS) among several technology options as an appropriate solution. This technology can enhance power system flexibility and enable high levels of renewable energy integration.

What is battery energy storage system (BESS)?

Battery Energy Storage Systems (BESS) play a pivotal role in addressing these challenges by minimising the intermittency of renewables, enhancing grid flexibility, and ensuring reliable power supply. In a significant development, Vietnam Electricity (EVN) has secured approval for its first pilot BESS project with a capacity of 50 MW/50MWh.

What is EVN's 50 MW battery energy storage system?

EVN's 50 MW Battery Energy Storage Systems (BESS) pilot project, in collaboration with ADB and GEAPP, aims for 300 MW by 2030. Vietnam is the fastest-growing energy market in Asia, according to the International Trade Administration. The government anticipates a 10-12% annual surge through 2030 in the nation's power consumption.
