

## SolarMax Energy Systems

# What are the large-capacity energy storage batteries in the Democratic Republic of the Congo

## Overview

---

How does the DRC influence the global battery supply chain?

Mining policy decisions made by politicians in the DRC's capital Kinshasa or mining regions like Kolwezi are felt throughout global battery supply chains. For instance, as the producer of 70% of the world's cobalt, the DRC has influence over the global electric vehicle battery supply chain.

How can Africa extend its access to the battery industry?

In so doing, the country and the rest of Africa can extend their access from the USD271 billion battery precursor segment to the more lucrative USD1.4 trillion combined battery cell production and cell assembly segments of the battery minerals global value chain.

Why does the DRC rely on hydroelectric power plants?

This is due to the DRC's proximity to cathode raw materials and heavy reliance on hydroelectric power plants.

## What are the large-capacity energy storage batteries in the Democratic Republic of Congo

---

### DRC is the world's largest producer of cobalt

The Democratic Republic of Congo is the world's major supplier of cobalt, used in electric vehicle batteries, and is asserting its rights as an equal ...
