

## SolarMax Energy Systems

# What are the photovoltaic solar panels

## Overview

---

A solar panel is a device that converts into by using multiple solar modules that consist of (PV) cells. PV cells are made of materials that produce excited when exposed to light. These electrons flow through a circuit and produce (DC) electricity, which can be used to power various devices or be stored in . Solar panels can be k.

### How do solar panels work? Solar power explained

At a high level, solar panels are made up of solar cells, which absorb sunlight. They use this sunlight to create direct current (DC) electricity through a process called "the ...
