

## SolarMax Energy Systems

# What industries are portable power supplies used in

## Overview

---

Who makes portable power units?

Japanese and Korean companies are the most involved in portable power units for electronic devices, and have recently launched a series of products that are mainly based on direct methanol-fuelled PEFC; large-scale commercialization of these devices is planned in the coming years.

Can a supercapacitor be used as a rechargeable power source?

For moderate energy demands in portable electronics, supercapacitors are suitable as rechargeable stand-alone power sources. In conjunction with rechargeable batteries in uninterruptible power supplies, supercapacitors can handle short interruptions and can extend battery life.

Which fuel is used in powering forklifts?

For higher output capacity in powering forklifts and other working vehicles, both methanol and compressed hydrogen fuels have been used. In this niche market, the number of delivered systems is increasing, although the target price for commercialization has not yet been achieved.
