

## SolarMax Energy Systems

# What is needed for French energy storage projects

All in one  
**50-500 Kwh**  
Hybird  
System

## Overview

---

The French government is actively supporting energy storage adoption through tax incentives, renewable energy subsidies, and carbon-reduction policies. Are energy storage projects legal in France?

However, energy storage projects in France face several legal and commercial challenges. In particular, the current regulatory framework allows for energy storage, but there is no legal framework designed for its development.

How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

How much storage capacity does France have?

In 2015, France had 5.82 GW of operational storage capacity, of which pumped storage comprised 5.81 GW. However electro-chemical storage is growing rapidly, in particular with lithium-ion batteries, with batteries accounting for nearly 52 per cent of the remaining storage capacity.

What is the French 'hydrogen plan'?

Finally, in 2018, the French Government launched a "hydrogen plan" committing €100 million per year for five years, aimed at developing this technology and in particular its energy storage potential, in order to unlock longer-term storage opportunities.

How much energy will France have by 2030?

In France, except for pumped storage, energy storage remains limited, but a forecast recently published by the French energy regulator (CRE) reports a potential of between 1 and 4 GW by 2030.

What is tagenergy doing in France?

“TagEnergy is proud to announce this flagship project in France, just weeks after connecting the first phase of the Southern Hemisphere’s largest wind farm in Australia and the UK’s largest transmission-connected battery”, said Franck Woitiez, CEO of TagEnergy.
