## Overview

---

How has the Davis administration reformed the energy system in the Bahamas?

Energy Reform APRIL 2025 Summary The Davis Administration has embarked on the most ambitious and far-reaching reform of the energy sector in the history of The Bahamas. This reform is guided by the understanding that energy is central to national development and that the longstanding failures in the electricity system.

What will Bahama's energy system look like in the future?

Clearly defined rules of engagement. Looking ahead, Bahamians can expect their energy system to become more than just functional. It will be a driver of prosperity. As the reforms continue to unfold, citizens will experience more equitable access to services, better value for money, and a greater degree of self-determination over their country.

What is securing the Bahamas' energy future?

Integrity, focus, discipline, and courage. This document, *Securing The Bahamas' Energy Future*, is a record of that choice—and a roadmap of the journey we are taking together. It lays out clearly where we started, the obstacles we inherited, and the urgent interventions we made.

How does energy affect the Bahamian economy?

Barriers across the Bahamian economy. Energy expenditures ranked among the top cost drivers for businesses, particularly in tourism, logistics, manufacturing, and services. With energy prices fluctuating between \$0.28 and \$0.35 per kilowatt-hour, and fuel surcharges tied to volatile oil markets, operational planning and.

How long will energy reform last in the Bahamas?

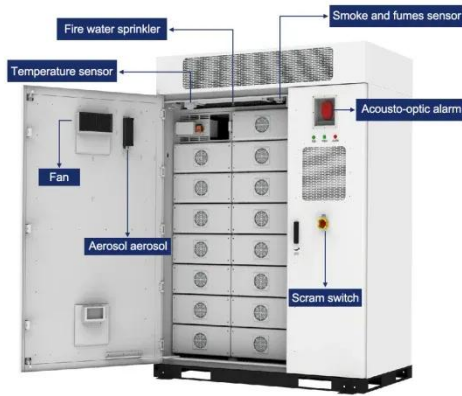

Energy reform over a 10-year horizon. The Bahamas stands apart globally in its

commitment to energy equity—providing the same level of reliability and access to its most remote and vulnerable community.

How much does electricity cost in the Bahamas?

Affordability and Price Expectations Affordability remains a central objective of the Davis Administration's energy reform programme. Historically, The Bahamas has had some of the highest electricity costs in the region, with consumers paying between \$0.28 and \$0.35 per kilowatt-hour, largely due to dependence on imported fuel.
