

## SolarMax Energy Systems

# What is the protection level of the energy storage outdoor cabinet product

## Overview

---

EK-372KWh Outdoor Cabinet, User side - Industrial and commercial energy storage Cabinet protection level IP54, fire isolation, safety design Can be freely installed according to site requirements Service life is increased by more than 20% compared with air cooling PACK-level fire protection, temperature difference between clusters of cells  $\leq 5^{\circ}$  Do outdoor energy storage systems need a lot of maintenance?

**Low Maintenance Requirements:** Outdoor energy storage solutions require low maintenance to ensure their longevity and performance. Cloudenergy's energy storage systems are engineered with this in mind, featuring advanced technology and durable construction that minimize the need for frequent maintenance.

Does cloudenergy have a high enclosure protection level?

**High Enclosure Protection Level:** Cloudenergy's energy storage solutions come with a high enclosure protection level, IP58, which means that they are well-equipped to handle exposure to dust, dirt, and moisture.

Are cloudenergy energy storage systems good for outdoor installations?

Designed to withstand various environmental conditions, Cloudenergy's energy storage systems offer exceptional benefits for outdoor installations. In this article, we will explore the unparalleled advantages of Cloudenergy's outdoor energy storage solutions. **Robust Construction and Weather Resistance:**

Why is protection important for outdoor installations?

This level of protection is crucial for outdoor installations, as it safeguards the internal components of our products from potential damage, prolonging their lifespan and ensuring optimal performance. **Flexible Installation Options:**

Are cloudenergy energy storage solutions scalable?

Cloudenergy's energy storage solutions are designed with scalability in mind, making them suitable for large-scale outdoor projects.

What is the temperature range of a power supply?

With a charging temperature range of 0°C to 45°C (32°F to 113°F) and a discharging temperature range of -20°C to 60°C (-4°F to 140°F), our products can effortlessly adapt to temperature fluctuations, ensuring stable performance and consistent power supply in various outdoor environments.

Scalability for Large-Scale Projects:

## What is the protection level of the energy storage outdoor cabinet
