

## SolarMax Energy Systems

# When will the price of battery cabinets drop

## Overview

---

How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.

Why did battery prices fall 20% in 2024?

In 2024, global average battery prices fell 20% to \$115 per kWh, driven by excess production capacity in China and burgeoning low-cost battery chemistries like lithium iron phosphate. In 2025 these conditions will persist and aided by low lithium prices, will continue to put downward pressure on battery prices.

Will low Lithium prices affect battery prices in 2025?

In 2025 these conditions will persist and aided by low lithium prices, will continue to put downward pressure on battery prices. In China, battery prices already dipped below \$100 per kWh in 2024. Whether we see these low prices around the world in 2025 will depend on trade dynamics for major auto markets, including tariffs.

How much does a 100 kWh battery cost?

A standard 100 kWh system can cost between \$25,000 and \$50,000, depending on the components and complexity. What are the costs of commercial battery storage?

Battery pack - typically LFP (Lithium Uranium Phosphate), GSL Energy utilizes new A-grade cells.

Are lithium-ion batteries still economical?

Lithium-ion batteries are still the most economical solution for most situations,

even without considering their trend downward pricing trend, but it takes a village, as they say- and ours should be doing all it can to ensure storage stays an economical solution for the foreseeable future.

What will EV battery prices look like in 2019?

Policy experts and clean tech executives share four predictions for the year ahead: EV battery prices dropping below cost parity with gas-powered cars, increased demand for grid-scale battery storage, carbon dioxide removal hitting scale, and permitting reform becoming a priority of Congress and the federal government.
