

SolarMax Energy Systems

**Which brand of communication
base station EMS equipment is
best**

Overview

What are the different types of communications equipment used in EMS?

Describe the basic principles of various types of communications equipment used in EMS (135-139) Repeater-Based Systems: a special base station radio that receives messages and signals on one frequency and then automatically re-transmits them on a second frequency.

What equipment is used in EMS?

EMS uses various equipment including: pocket mask, bag-valve-mask, flow restricted, oxygen-powered ventilation device, oral airways, nasal airways, suction units, suction catheters, laryngoscope, magill forceps, oxygen tank, regulator, nonrebreather mask, nasal cannulas, tongue blade, and lubricant. This equipment is essential for providing emergency medical care.

What makes a good EMS Station?

By Rachel Zoch, EMS1 BrandFocus Staff An EMS station needs to provide the comforts of home as well as the tools for work, from restful sleeping quarters to office space and equipment storage. Energy efficiency and safety should also be top of mind, whether you are making improvements to your current station or building a new facility.
