

SolarMax Energy Systems

Which company in the Solomon Islands has the most photovoltaic sites

Overview

What percentage of the Solomon Islands' electricity mix is renewable?

Renewable energy only makes up 2% of the Solomon Islands' electricity mix. Image: Namkoo Solar. A group of investment firms led by the Asian Development Bank (ADB) has partnered with the government of the Solomon Islands to finance new solar PV power plants, increase rooftop solar PV installations and support the islands' power sector reforms.

Can a solar PV system boost economic growth in the Solomon Islands?

A pilot business model for rooftop solar PV systems will also be trialled at two schools in the country. Shane Rosenthal, ADB's Pacific liaison and coordination office regional director, believes that upscaling renewable energy generation in the Solomon Islands could help unlock economic growth and prosperity.

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

What is the main source of electricity in Solomon Islands?

In Solomon Islands, electricity is primarily generated through the combustion of fossil fuels. The demand for power in Honiara, the capital, has been increasing rapidly since 1996, but the power plants have not been able to keep up with the demand.

Can photovoltaics be used for rural electrification in the Solomon Islands?

The success of the Sukiki project in the Solomon Islands, where photovoltaics are used for rural electrification, has brought delight to the government and people. They hope that continued use of photovoltaics for rural electrification will serve as a beacon of hope, not just for the Solomons but for the rest of the

world as well.

What is the Asian Development Bank doing in Solomon Islands?

The Asian Development Bank is working with the Government of Solomon Islands and Solomon Power to convert electricity networks in five provinces almost entirely to solar power. The project will reduce the need for costly shipments of diesel to the provincial centers. LATEST PROJECT DOCUMENTS 1.
