

## SolarMax Energy Systems

**Which type of solar panel has  
the best light transmittance**

## Overview

---

Transparent solar panels currently achieve visible light transmission rates of 45% while maintaining power conversion efficiencies around 0.8. What are the most efficient solar panels?

The most efficient solar panels on the market generally use either N-type back-contact (BC) monocrystalline silicon cells or other highly efficient N-type variations, including heterojunction (HJT) and TOPcon cells.

Which type of glass is best for solar panels?

This type of glass is more transparent and can significantly enhance the amount of light reaching the photovoltaic cells, thus boosting the overall efficiency of the solar panel. Low-iron glass is especially beneficial in high-performance solar panels where maximizing light transmission is critical.

Is low-iron glass a good choice for solar panels?

Low-iron glass is especially beneficial in high-performance solar panels where maximizing light transmission is critical. Additionally, the type of glass used can influence the panel's temperature coefficient.

Which company has the most efficient tandem solar panels?

However, one company, Oxford PV, who holds the record for the most efficient commercial-sized perovskite-on-silicon tandem solar panel at 26.8%. In September 2024, Oxford PV secured a commercial deal to deliver panels with an efficiency of 24.5% to an undisclosed US company for small utility-scale project.

What makes a good solar panel?

Another important aspect is the use of low-iron glass in solar panels. Standard glass contains iron, which can absorb and filter out some of the sunlight. Low-iron glass, however, has a lower iron content, allowing more sunlight to pass through.

Are monocrystalline solar panels a good choice?

Monocrystalline solar panels Monocrystalline solar panels are the most efficient type of solar panel currently on the market. The top monocrystalline panels now all come with 22% efficiency or higher, and manufacturers are continually raising this bar.
