

SolarMax Energy Systems

Wind Solar Storage and Transmission Integrated Project

Overview

The Pumped Storage Hydropower Wind and Solar Integration and System Reliability Initiative is designed to provide financial assistance to eligible entities to carry out project design, transmission studies, power market assessments, and permitting for a pumped storage hydropower project to facilitate the long-duration storage of intermittent renewable electricity.

Wind Solar Storage and Transmission Integrated Project

Assessing the value of battery energy storage in ...

MIT and Princeton University researchers find that the economic value of storage increases as variable renewable energy generation (from ...
