

**SolarMax Energy Systems**

# **Xiaxi Battery Energy Storage Module**

## Overview

---

Does Pixii provide battery energy storage system in Germany?

Pixii delivers major battery energy storage system in Germany. Power & Air Solutions (PASM), a Deutsche Telekom subsidiary, has completed its first battery energy storage system (BESS), supplied by Pixii. The storage system is installed at one of Deutsche Telekom's main offices in Munich.

What is a battery energy storage system (BESS)?

To address this challenge, battery energy storage systems (BESS) are considered to be one of the main technologies . Every traditional BESS is based on three main components: the power converter, the battery management system (BMS) and the assembly of cells required to create the battery-pack .

What is a battery energy storage system?

Battery Energy Storage Systems (BESS) are key for a stable resilient power grid, integrating renewable sources to empower communities with energy that's clean, reliable and affordable.

What are the critical components of a battery energy storage system?

In more detail, let's look at the critical components of a battery energy storage system (BESS). The battery is a crucial component within the BESS; it stores the energy ready to be dispatched when needed. The battery comprises a fixed number of lithium cells wired in series and parallel within a frame to create a module.

What types of batteries does the pixiibox support?

Our system supports a wide range of battery brands and technologies. Whether the application requires LFP or NMC batteries or emerging battery technologies, the PixiiBox together with the Pixii Gateway ensures optimal performance, monitoring and managing the health and efficiency of the

battery.

What is energy storage system products list?

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.
